

Landscape Detail Changes February 2019

The following is a list of detail changes and descriptions.

General Changes

Detail sheets have been reorganized to the following naming and numbering structure: L501 General Irrigation Details, L502 Irrigation Valve Details, L503 Irrigation Control Details, L504 Irrigation Drip Emission Details, L505 Irrigation Connection Details, and L506 General Planting Details.

Throughout the detail sheets there have been revisions including those for callout consistency and graphic uniformity. Specific changes include the following:

L502/A and G (Two-Wire System Valves)

Revised extra wire callout.

Removed size from conduit callout.

L502/E

Modified note below title describing where it is to be installed.

L502/F

Added Isolation valve.

L502/H

Clarified ball valve placement.

L503/A (All Controller Details)

Changed grounding conduit to PVC.

L503/A (WeatherTRAK Detail)

Clarified conduit for WeatherTRAK LC controller.

L503/B (All Controller Mount Options)

Change conduit on mounting options from "Galvanized IMC" to "Conduit."

L503/D & E

Added designer note.

L504/B

Added weed barrier graphic representation.

Added callout for check valve when installing indicator emitter on hillsides.

L504/C

Added weed barrier graphic representation.

Added Note 2.

Added clarification for barbed tee.

L504/D

Changed "PVC Exhaust Header" callout to "In-line Emitter Tubing."

L504/E

Replaced old "In-line Drip Center Feed Layout" with "In-Line Layout Planter."

L504/F

Added Note 3.

L504/H
