

STANDARD PLAN INFORMATION NOTIFICATION

Physical Facilities Department

This Notification describes new information that may be helpful in your work with the meetinghouse standard plan program. Please take time to review the information in order to understand the effect this information may have on construction work under your stewardship.

Thank you for your attention to this important information.

Date of Notification: *October 21, 2002*

Information Title:

Approved IBC 2000 Code Modifications for Spire Heights

Information:

The attached document summarizes recently approved 2002 ICC Public Hearing Results regarding spire heights. Prior to this approval our standard plan spires did not meet the IBC codes and as such required the spire height to be reduced or in the alternative application made to the local code agency for consideration of "alternative materials, design and methods of construction" pursuant to Section 104.11 of the IBC. Until such time as the approved code change is published (2003) and local code agencies adopt it (2004-2005) projects constructed in IBC jurisdictions will still be required to submit for approval under alternative means as set forth above.

Instructions for Implementation:

The attached language for FS104-02 and FS106-02 is taken directly from 2000 ICC Public Hearing minutes and can be used in formulating your response to the local code agency.
