

STANDARD PLAN INFORMATION NOTICE

Physical Facilities Department

This notice addresses new information that may be helpful in your work with the meetinghouse standard plan program. Please take time to review the information in order to understand its potential impact on construction work under your stewardship.

Date of Notification: July 30, 2004

Information Title:

Radio-Control Clocks

Information:

The wood stained clocks produced by Deseret Industries Manufacturing (approved for use in chapels and Relief Society rooms) will now ship standard with a Radio Control Movement. This will affect all orders received after July 6, 2004. These movements keep time and adjust themselves automatically by picking up the universal time signal transmitted from Colorado. The clock will also adjust automatically for Daylight Savings Time in the Spring and Fall. Those areas that do not observe Daylight Savings Time can set the clock to bypass this function.

Please note that radio control movements may not work in all areas of the country, or in all areas of a building. A weak signal or other obstructions that interfere with reception of the signal (either electrical or physical) may cause a malfunction. For this reason, a Quartz Movement will also ship with each clock as a replacement to the Radio Control Movement mounted in the clock.

The clocks will ship with instructions for setting the radio-control movement, as well as for installing the quartz movement if necessary. These instructions, as well as the quartz movement, should be retained for future reference and not discarded. It is recommended the clocks be set a day or two prior to installation to ensure they have picked up the radio signal and set properly.

For those with a Meetinghouse PRG, please note the total cost of this clock will now be \$65.00 each, regardless of wood stain color.

Instructions for Implementation:

None.
