

# STANDARD PLAN INFORMATION NOTICE

Physical Facilities Department

This notice addresses new information that may be helpful in your work with the meetinghouse standard plan program. Please take time to review the information in order to understand its potential impact on construction work under your stewardship.

**Date of Notification:** *October 27, 2005*

## Information Title:

### *Update to Cobblestone Fabric Problem*

## Information:

*Testing of the "Cobblestone" fabric and results of the Cobblestone Survey received from facilities managers (reference SPI No. 025) indicate the following:*

### Description of Problem

- *Cobblestone fabric produced between April 2004, and February 2005, may show limited signs of latex penetration. This manifests itself as periodic, random, small white spots on the surface of the fabric. Information from the manufacturer and results of our headquarters survey indicate that **most fabric leaving the mill during this time does not exhibit this problem.***
- *Cobblestone fabric produced between February 2005, and July 2005, may exhibit a sporadic chalky haze on the surface of the fabric. The presence of the chalky haze also tends to accent or hi-light spills and attempts at spot cleaning, thus appearing to stain abnormally. Information from the manufacturer and results of the survey indicate that **not all fabric produced during this time exhibits this problem.***
- *Cobblestone fabric produced after July 2005, has not exhibited the above problems.*

### Solution

- *The chalky haze and staining resulting from minor spills or spot cleaning can be removed through a hot water extraction cleaning process. Instances of latex penetration, though more difficult to remedy, can be significantly improved through a more rigorous cleaning process.*
- *Since the above problems were the result of improper manufacturing of the fabric, the fabric mill has agreed to clean the Cobblestone fabric at those installations exhibiting the above problems. Whether the cleaning will be done by a team from the mill or contracted locally will be determined and communicated in a subsequent Information Notice.*

### Note

- *Some survey results included problems with fabric occurring prior to April 2004, confusing the Cobblestone fabric with its predecessor, Mandalay. Reports of problems occurring prior to April 2004 have accordingly been omitted from the list of defective fabric installations and are not eligible to be cleaned and revitalized by the fabric mill.*

## Instructions for Implementation:

*Facilities management groups: Please review the attached document. If you have a building with Cobblestone fabric exhibiting the problems referred to above and **do not** find it on the attached list, please contact Michael Jenson **no later than November 2, 2005**, by e-mail at [jensonmb@ldschurch.org](mailto:jensonmb@ldschurch.org).*
