SPI No. 54

STANDARD PLAN INFORMATION NOTICE

Architecture, Engineering and Construction Division

This notice provides new information that may be helpful in your work with the standard plan program. Please carefully review this information to understand its potential impact on any design, construction, and R&I work within your stewardship.

Date of Notice: *03 Sep 2009*

Information Title: *Dinnerware Kit Discontinuation*

Information:

In response to feedback from the field concerning the increasing use of disposable dinnerware at activities, dinnerware kits (comprising stoneware dinner plates, salad plates, soup bowls, and reusable plastic drinking glasses) will no longer be automatically provided for New Construction projects.

The default quantity for dinnerware kits in the Style and Furnishings Selection Record has been changed to zero; however, the stake president may still request dinnerware kits for New Construction projects.

Flatware (knives, forks, and spoons) will continue to be automatically provided as part of the kitchen kit for a New Construction project.

Dinnerware kits will continue to be available in the Purchasing Reference Guide for replacement and improvement projects.

Instructions for Implementation:

This change became effective on 17 August 2009 and only affects orders submitted after that date.
