

Specification Changes October 2019

The following is a listing of specifications that have changed along with relevant descriptions. There is minor re-wording and re-formatting throughout these sections.

32 8423 Underground Sprinklers – No Controllers

Modified consultant edit notes. Removed one “Native Material” callout under Part 2 Materials section. Did away with Canadian rotor material section. Added the Amiad Mini-Sigma filter and replaced the Amiad TAF filter.

32 8466 Underground Sprinklers: Controllers

Clarified use of smart and automatic controllers in procedural notes and elsewhere. Modified consultant edit notes. Revised both WeatherTRAK Smart Controller Checklists for New and Existing projects to address naming conventions.

32 9001 Common Planting Requirements

Removed procedural notes and modified consultant edit notes. Consolidated “weed-killer” and “post-emergent” terms to term “herbicide.” Removed Part 2 list of post-emergent weed control.

32 9120 Topsoil and Placement

Revised procedural notes and modified consultant edit notes.

32 9300 Plants

Modified consultant edit notes. Removed use of term “top-dressing mulch.” Replaced with “organic mulch” or just “mulch.” Adjusted wording in 3.1 Examination. Removed redundant text in 3.3. Revised Section callouts to reference most current Section numbers.
