MSPC Decisions Affecting North America Operations—No. 2

MSPC Meeting: 16 August 2012

Notification to Field: 16 October 2012

Item 1: Banquet Tables

The Presiding Bishopric has approved a recommendation from MSPC that Life Time Products will become the standard folding table supplier, both rectangular and round tables, for all New Construction Projects. Prior to this the supplier for folding tables has been Mity-Lite. After evaluation it was determined that Life Time's tables design provides more knee space, is construction of high density polyethylene, has no edge band, has surfaces that are stain and solvent resistant, and has a 15 year warranty. The Life Time rectangular tables can stack on existing under platform storage carts, but due to a thicker edge their round tables cannot fit within existing (Mity-Lite) fixed table racks. Life Time has contracted with a table rack supplier to make a rack for their table for new installations.

Mity-Lite 60-inch round tables will remain available through the Purchasing Reference Guide for Replacement and Improvement projects where existing storage racks do not accommodate the Lifetime round table. Replacement of rectangular tables would be with the Life Time Products rectangular table.
